

Task-based I&IT Services OSS 00175018

PSTG Consulting entered into a Master Agreement for Task-based Information and Information Technology (I & IT) Services with the Ministry of Government Services on October 1, 2011 that extends to the end of September 30, 2014. The Task Based I & IT Services Agreement provides the OPS ministries and scheduled agencies with a corporate wide resource to obtain expert resources to meet their business needs over the next three years. For client ministries, implementing the government's agenda requires simultaneous change to business processes, technology, structure (people/culture), and integration mechanisms. The agreement offers ministries access to resources that will assist them in dealing with many of the inherent challenges and issues involved in determining and implementing appropriate business and technology solutions.

As part of the agreement PSTG is glad to offer the following roles for each of the service categories to the Government of Ontario:

Service Category: Business Analysis & Planning
